

ABHILASH REDDY SANNAREDDY

Problem-First Builder — Product Strategy | AI Systems | Entrepreneurship

Andhra Pradesh / Chennai, India | +91 7032026509 | sannareddyabhilashreddy@gmail.com | LinkedIn | GitHub | Portfolio

Education

2023–2027	VEL TECH RANGARAJAN DR. SAGUNTHALA R&D INSTITUTE OF SCIENCE & TECHNOLOGY B.Tech in Computer Science Engineering with Specialization in Artificial Intelligence & Machine Learning CGPA: 9.19/10 (Till Sem. VI)	Chennai
2021–2023	SRINIVASA JUNIOR COLLEGE Senior Secondary (Class XII) 94.2%	Vidyanagar
2019–2021	SRI CHAITANYA SCHOOL Secondary (Class X) 99.5%	Nellore

Experience

Jun'25–Oct'25	MODERN AGRICULTURE TECHNOLOGY INNOVATION CENTER (MATIC) <i>Agentic AI Developer Intern MADeIT-Incubated Startup at IIITDM Kancheepuram Full-Time, Hybrid</i> - Identified fragmented, manual workflows across startup operations by working directly with founders to uncover root causes, then prioritized the highest-impact automation opportunities - Translated ambiguous operational problems into structured product requirements, and designed agentic AI workflows using LLMs, LangGraph, LangChain and full-stack technologies - Built and scaled Assist Pro, an AI-powered automation platform, reducing manual effort by over 75% across startup operations	Chennai
---------------	---	----------------

Product Case Studies

- AI Salesperson for E-Commerce** – E-commerce platforms make customers search, filter, compare, and decide what fits their needs; designed a conversational **Customer Decision Engine** that understands customer intent through voice/chat, asks decision-relevant questions, learns preferences and rejections, and shifts e-commerce from **product search** → **customer understanding** → **curated recommendations**, narrowing large catalogs to 2–3 confident options.
- Delivery ETA Intelligence Platform** – Customers are forced to keep their day open for broad 9 AM–11 PM delivery windows; proposed a dynamic ETA layer using **route, GPS, traffic, OpenBox & customer availability** to convert these broad windows into **focused, customer-aware delivery windows** that continuously adapt to changing conditions, reducing waiting uncertainty, WISMO tickets & failed deliveries.
- OpportunityOS** – Companies collect massive user signals across reviews, forums & tickets but struggle to discover which problems are worth solving; designed a **multi-agent AI system** that converts signals into emerging problems and scores them across **severity, prevalence, growth momentum, underservedness, feasibility & novelty**, bringing AI from **problem solving to problem discovery intelligence**.
- Intics – Enterprise AI Strategy** – Recognized that Intics' AI generates strong recommendations with no way to verify whether they worked or to act on them end-to-end; proposed **Outcome, Action & Trust** layers that let the platform learn from real business results while all customer data stays on-premise, preserving Intics' sovereign-AI promise.
- India Battery Lifecycle & Recovery Platform** – Found that India's announced Li-ion recycling capacity (**80,000+ tonnes/yr**) is already $2.2\times$ its entire 2025 end-of-life battery supply (**~36,000 tonnes/yr**), yet only **~5,000 tonnes (~14%)** get collected formally each year – so the real bottleneck isn't recycling capacity, it's collection; designed an asset-light **Find → Collect → Grade → Route** platform partnering with existing recyclers to close that feedstock gap ahead of India's projected **233,000 tonnes/yr EOL** volume by 2035.

Leadership & Entrepreneurship

Feb'25–Present	YANTRIKSHA X HUB <i>Founder, Chairman & President Student Innovation & Entrepreneurship Ecosystem</i> - Identified a gap in interdisciplinary problem discovery among students; built a 700+ student, 300+ alumni ecosystem across engineering, management & law using a Confusion (-1) → Idea (0) → Product (1) framework to guide teams from ambiguity to a validated idea to a working product - Facilitated 100+ internships, supported 100+ patentable projects, and built a network of 20+ industry experts via IICs, TBIs & startup partners	Chennai
Feb'26–Present	JUST BETWEEN US (JBU) <i>Show Director Student-Led Town Hall Platform</i> Co-created a platform bridging students and accomplished leaders; led speaker outreach, content curation & event ops across 4 episodes, engaging hundreds of students	Chennai

Achievements & Competitions

- Winner** – Prototyping Contest; **Winner** – Cybersecurity Bootcamp, IIITDM Kancheepuram; **Runner-Up** – Project Idea Contest
- Organizer** – VISA I 2026 (720+ students, 240+ teams, 44 institutions, 14 industry partners); **SIH 2026 Internal Hackathon** (70 → 200+ teams); **L&T Techgum 2025 & 2026**
- Evaluator** – Innovation Marathon, KRM Public School (300+ submissions); **Volunteer** – SDIP 4.0, EDII-Tamil Nadu

Technical Projects

- Cloud Billing & Order Management Platform** – Local restaurants paid for dedicated computers, hardware & upkeep at every billing/printing counter; built a low-cost ESP+MQTT thermal-printing system letting printers receive orders directly, cutting hardware dependency and scaling pilot volume $6\times$ (25 → 150+ orders/day; **9K → 55K orders/year**).
- Precision Bid Management & Tender Analysis System** (Pragyan Hackathon × Aurigo Software) – Contractors manually evaluated technical, financial & competitor data for bids; built an ML-powered decision-support platform analyzing historical bids, pricing & competitor trends to balance competitiveness with target profitability.
- AI-Powered Smart Agriculture & Farm-to-Market Platform** (Winner – Prototyping Contest) – Farmers managed seed procurement, irrigation, monitoring & selling as disconnected processes; integrated IoT sensors (NPK, soil moisture, temperature, pH) with ML across the farm-to-market chain, achieving **98.4%** prediction accuracy for crop & irrigation decisions.

Skills

Product Management: Product Discovery, User Research, Problem Framing, Roadmapping, Prioritization, Stakeholder Management, A/B Testing
AI & Agentic Systems: LLMs, Agentic AI (LangGraph, LangChain, LangSmith), AI Workflow Automation (n8n), Prompt Engineering
Business & Analytics: SQL, Power BI, MS Excel, Go-to-Market Strategy, KPI Tracking, Competitive Analysis
Development & Cloud: Python, Java, JavaScript (React, Node.js), AWS, GCP, Firebase, Git
Languages: English (Professional), Telugu (Native), Hindi (Professional), Tamil (Working), German (Basic)
