

ABHILASH REDDY SANNAREDDY

Problem-Driven Builder — Product Innovation, AI Systems & Entrepreneurship

Andhra Pradesh / Chennai, India

+91 7032026509 | sannareddyabhilashreddy@gmail.com

LinkedIn | GitHub

Professional Summary

Problem-driven Computer Science Engineering student specializing in Artificial Intelligence, Machine Learning, Agentic AI Systems, and Full-Stack Development. Passionate about problem discovery, uncovering root causes, understanding user and business needs, and building scalable solutions at the intersection of technology, product innovation, and entrepreneurship.

Experienced in developing AI-powered automation systems, intelligent workflows, and product-driven solutions, with hands-on experience in Agentic AI, workflow orchestration, startup operations, and business process automation. Skilled at translating ambiguous challenges into practical, user-centric solutions through a combination of technical expertise, product thinking, stakeholder collaboration, and entrepreneurial problem-solving.

Founder of a **700+ member student-led innovation ecosystem**, facilitating 100+ internships, supporting 10+ patentable projects, and helping students transform identified problems into validated ideas, products, and ventures through interdisciplinary collaboration, industry engagement, and startup-driven innovation.

Education

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science & Technology

Chennai, India

B.Tech in Computer Science Engineering (Artificial Intelligence & Machine Learning)

CGPA: 9.2/10

Expected Graduation: 2027

Skills

- **Product Management:** Problem Discovery, Product Thinking, User Research, Market Research, Competitive Analysis, Requirements Gathering, Product Validation, Stakeholder Management
- **Data & Analytics:** MySQL, Microsoft Excel, Power BI, Google Analytics, Data Analysis, KPI Tracking, Dashboarding, Decision Support Systems
- **Business & Strategy:** Business Analysis, Innovation Management, Startup Operations, Process Optimization, Cross-Functional Collaboration, SEO
- **Product & Design Tools:** Figma, Canva, Adobe Photoshop
- **AI & Emerging Technologies:** Agentic AI, LLM Applications, Prompt Engineering, Machine Learning, Intelligent Automation
- **Technical:** Python, Java, JavaScript, React.js, Node.js, Spring Framework, HTML, CSS

Professional Experience

Agentic AI Developer Intern

Jun 2025 – Oct 2025

Modern Agriculture Technology Innovation Center (MATIC)

MADeIT Incubated Startup at IITDM Kancheepuram

Chennai, Tamil Nadu, India — Full-Time — Hybrid

- Analyzed operational bottlenecks across 5+ business functions to identify automation opportunities, define solution requirements, and improve operational efficiency.
- Developed and enhanced Assist Pro, an AI-powered automation platform that reduced manual effort by over 70% across startup operations.
- Designed and implemented intelligent workflow solutions across 20+ business processes using AI agents, workflow orchestration, and full-stack technologies.
- Collaborated directly with founders and cross-functional stakeholders to translate business challenges into scalable technology-driven solutions aligned with operational and strategic objectives.

Leadership Community Building

Founder, Chairman & President — Yantriksha X Hub
Chennai, Tamil Nadu, India

Feb 2025 – Present

- Identified critical gaps in interdisciplinary collaboration and structured **problem discovery** within the student ecosystem, and founded Yantriksha X Hub to help students transform real-world problems into validated ideas, products, and ventures through collaboration among engineering, management, and law students.
- Developed the **-1 → 0 → 1 framework**, enabling students to progress from **confusion and ambiguity around a problem (-1)** to a **validated idea (0)** and ultimately a **working product (1)** by integrating technical feasibility, business viability, and legal considerations from the earliest stages of product development through workshops, hackathons, mentorship, and experiential learning.
- Scaled the initiative into a multidisciplinary ecosystem of **700+ active students** and **300+ alumni**, facilitating **100+ internships**, supporting **10+ patentable projects**, enabling multiple student-led startups, and building a network of **20+ industry experts** through collaborations with **IICs, TBIs, startups, and industry partners**.

Show Director — Just Between Us (JBU)
Chennai, Tamil Nadu, India

Feb 2026 – Present

- Identified a gap between students and accomplished leaders, entrepreneurs, innovators, and public personalities, and co-created a student-led town hall platform to facilitate meaningful conversations on leadership, innovation, and personal growth.
- Led end-to-end planning and execution across speaker outreach, content curation, partnerships, and event operations, delivering **4 episodes** featuring **4 accomplished speakers** and engaging **hundreds of students**.

Projects

AI-Powered Smart Agriculture & Irrigation System

Winner — Prototyping Contest

- Identified challenges in irrigation planning, crop selection, and resource utilization that contribute to inefficient agricultural decision-making and water consumption.
- Developed an AI-powered decision-support system integrating IoT sensing and machine learning to analyze 6+ agricultural parameters, including NPK levels, soil moisture, temperature, humidity, and pH, enabling data-driven crop recommendations and irrigation optimization with 98.4% prediction accuracy.

Precision Bid Management & Tender Analysis System

- Identified inefficiencies in competitor analysis and tender evaluation during the Pragyan Hackathon in collaboration with Aurigo Software Technologies, where decision-making relied on manual assessment across multiple technical, financial, and strategic criteria.
- Developed a decision-support platform that analyzed 10+ bid evaluation parameters for competitor benchmarking, tender assessment, and strategic bid optimization, enabling faster and more structured decision-making.

Achievements

- Organizer — **16th International Project Competition & Exhibition (VISAI 2026)**, coordinating a multi-stakeholder innovation event involving **720+ students**, **240+ teams**, **44 institutions**, and **14 industry partners**.
- Winner — **Prototyping Contest** for AI-Powered Smart Agriculture & Irrigation System.
- Winner — **Cybersecurity Bootcamp**, IIITDM Kancheepuram.
- Runner-Up — **Project Idea Contest**.
- Innovation Marathon Evaluator — **KRM Public School**, evaluating **300+ student innovation and project submissions**.
- Organizer — Preliminary Rounds of **L&T Techgium Hackathon**, supporting participant engagement and event execution.
